BERNARDO OROZCO

Senior Brand & Visual Designer

Identity systems for brands ready to grow into themselves.

8+ years · Guadalajara, Mexico · Remote
boboteme@gmail.com · behance.net/btm20

I'm a Senior Brand & Visual Designer with 8+ years of experience helping startups and growing businesses build distinctive, scalable brands. Since 2022 I've run my own independent studio, working directly with founders across technology, esports, hospitality, e-commerce, and consumer brands.

I specialize in building visual systems that stay consistent long after the project ends — from positioning and identity through to the templates teams actually use.

01 — SKINCARE · LATAM MARKET

AR•YA Cosmetics

Brand Identity · Packaging · Art Direction

The brand lacked a cohesive visual identity and felt generic in a highly competitive premium skincare market, making it difficult to stand out or build trust with a modern audience.

- Brand strategy & positioning
- Visual identity system
- Packaging & art direction
- E-commerce visual strategy

I developed a minimalist monogram based on a geometric structure that integrates a double “A”, symbolizing unity and balance. The mark is built around a central point acting as its axis of symmetry — a timeless form that reads as clarity, purity, and elegance at any scale. I extended the system across packaging, e-commerce, and marketing to keep it consistent end to end.

- Soft Gray
- Royal Blue

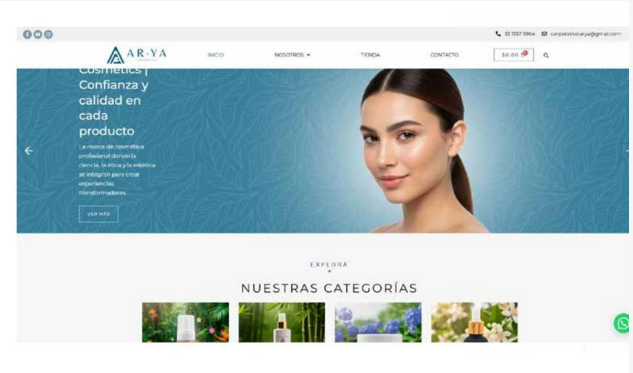

– Built a scalable visual system spanning packaging, e-commerce, and social content.

– Adapted the identity for print production, the digital storefront, and the LATAM market.

– Created a modular template system the brand could run independently after handoff.

Role: Brand Design & Art Direction
Website development: Orion Studio.

02 — DIGITAL TRANSFORMATION · B2B

STURIO

Tech Brand Identity · Visual Systems

Sturio needed a professional and trustworthy brand presence to support its role as a strategic partner for technology companies. The existing identity lacked clarity and did not reflect its focus on innovation, transparency, and long-term relationships.

- Brand strategy & positioning
- Visual identity system
- Corporate branding
- Marketing & communication assets

I developed a modular geometric identity inspired by digital systems and connectivity. The logo abstracts a structured “S” form on a strict grid, creating a visual language that reflects flow, data, and transformation. I built the system to hold clarity at any scale, from a favicon to a conference banner.

– Built a structured visual system for consistent corporate communication.

– Extended the identity across corporate collateral, digital platforms, and marketing assets.

– Created flexible assets adaptable to multiple business contexts.

Role: Brand Design & Visual Systems

03 — HOSPITALITY · EVENTS

Ex Hacienda de Cedros

Heritage & Hospitality Destination Branding

The 500-year-old hacienda required a refined visual presence to position itself as a premium destination for events and experiences — highlighting its architecture, atmosphere, and exclusivity with a consistent, elegant identity.

- Brand strategy & positioning
- Visual identity system
- Marketing assets
- Art direction

I centered the identity around a cedar tree, symbolizing strength, longevity, and the natural essence of the hacienda. Surrounding branches form a circular composition inspired by the estate itself, evoking unity and heritage. I paired the mark with calligraphic type to introduce elegance and hospitality, then extended the system across print, signage, and digital touchpoints.
